## CAREER SUMMARY

I seek challenging opportunities where I can fully utilize my skills and expertise on Product development for the success of the organization by developing perfect end to end solutions that scales easily and automates everyday tasks.

## WORK EXPERIENCE

### Fullstack Developer GitStart

At GitStart I developed and maintained a web app for a bank/fintech company the app's frontend was in React while the Backend was written in Node, Express, MySQL. I also worked on a microfrontend application written in React and packed with Webpack. I worked as a fullstack developer, switching roles frequently and occasionally working on the frontend and backend. I was also involved in testing using Cypress, react testing library for frontend and jest for backend.

Technologies used:

React JS Node Js Express JavaScript WordPress Mongo Db Socket I.O Pern Stack  
Micro Frontend React Native MYSQL Vue JS AWS DevOps GitHub Cypress

### Fullstack Developer 2017 -2020 OGUN STATE

I worked as a full-stack engineer at Ogun Tech Hub, I managed, maintained, and built web applications as well as trained staff in web development courses. I was involved in server administration as well as DevOps. I built new features for existing apps, fixed issues and bugs, and built serverless backend services; designed, deployed, and maintained WordPress sites; and wrote and deployed REST APIs.

Technologies used:

Wordpress CSS HTML JavaScript HTML/SASS MySQL React Node JS  
Typescript PHP React Native Jomla GitHub BitBucket

### SENIOUR SOFTWARE ENGINEER (REMOTE) 2020 - 2021 TRADE DEPOT

I worked at Trade Depot as a Full Stack Developer, but majorly on the Backend. I worked on projects alongside a team of developers. My duties revolved around developing feature upgrades, writing fixes to current issues, writing API's to be consumed by the mobile Apps, and many more.

Achievements:

Worked on a USSD Loan application for giving customers loans.  
Deployed a payment gateway (API) that integrates the Firstbank and EBIL Pay services  
Maintained the internal admin part of the Shop Top Up Application (on google play).  
Build the suppliers Dashboard Frontend (as seen on www.tradedepot.co)  
Built API for the mobile app "Shop TopUp" and also the ShopTopUp Agent (available on Play store).

Technologies used:

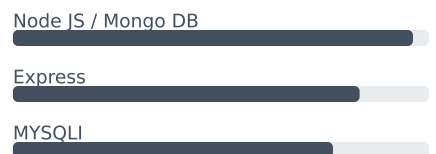

React JS Node JS MongoDB Serverless JS Express JS AWS BLAZE Meteor JS  
React Native GitHub CI/CD Rest API Moncha Chai

## SKILLS & TOOLS

### FRONT END

### BACK END

### Others

DevOps Git Unit Testing SCRUM  
AWS Serverless WordPress Bootstrap  
REACT NATIVE Vue JS LINUX REDUX

## EDUCATION

BSc in Computer Science  
Crawford University  
2008 - 2012

## LANGUAGE

English (Fluent)

Yoruba (Native)

## INTERESTS

Singing  
Reading  
Coding
